

Saving Energy. Saving Money.

Bright Energy Solutions® is a portfolio of cash-incentive programs that can help your business reduce power costs and operate more efficiently. You can earn rebates for installing energy-efficient equipment, and continue to enjoy the energy savings for years to come. Take advantage of these incentives for businesses:

Lighting – Retrofits

- Fluorescent T8 and T5 retrofits
- T8 and T5 high bays
- T8 high-performance systems
- T8 low-wattage systems
- Ceramic and pulse-start metal halides
- CFL lamps, fixtures and flood lamps
- Select light-emitting diode (LED) technologies
- Lighting sensors and controls
- Tubular skylights

Lighting – New Construction

- T8 high bays
- T5 high-output high bays
- T8 high-performance systems
- T8 low-wattage systems
- Select LED technologies

Heating & Cooling

- Central air systems and chillers
- Air-source heat pumps
- Ground-source heat pumps (geothermal)
- Packaged terminal units (PTACs)
- Window air conditioners
- Programmable thermostats
- Heat-pump water heaters

Motors/Pumps/VFDs

- Premium efficiency motors

Specialty Measures

- Clothes washers and dishwashers (with electric water heat)
- Vending equipment controls
- Anti-sweat heater controls for coolers and freezers
- Night covers for refrigerated display cases
- Computer network power management
- Engineered compressed air nozzles

Food Service

- Full range of ENERGY STAR® kitchen equipment
- Kitchen hood controls
- Electronically Commutated Motors (ECMs) in walk-in freezers and coolers

Targeted Audit for Schools and City-Owned Buildings

- Your utility will pay half the cost of an energy audit, conducted by our team of energy experts.
- If the most cost-effective recommended measures are completed within two years, the utility will reimburse the school or city for its half of the audit cost.

Custom Incentive

- Provides incentives for energy-saving measures that are not covered by one of the other Bright Energy Solutions programs.
- Incentive is based on effectiveness of measure.
- Pre-approval of project is required.

Our Bright Energy Solutions team can help you get the most from your energy dollars! For more details, visit our website today at www.brightenergysolutions.com, or call your local utility.

We're here to
help you

Download a Bright Energy Solutions application at www.brightenergysolutions.com or call your local utility.

Bright Energy Solutions and your local municipal electric utility can offer your business cash rebates when you install energy-efficient equipment. Take advantage of these incentives today!

- Save Money
- Operate Efficiently
- Reduce Your Utility Bill
- Save Natural Resources
- Realize Long-Term Savings
- Help Protect the Environment

The Bright Energy Solutions programs are offered through your local municipal utility in partnership with its power supplier, Missouri River Energy Services.

These programs can be changed at any time without notice, and are available on a first-come, first-served basis. Some projects must be preapproved to qualify for an incentive. Equipment ordered, purchased, or installed prior to approval may not qualify.

Please refer to the individual program terms and conditions for more information.

Take the first step to
improving energy use
in your business
