

Top Ten Energy Tips for 2010

2010 is here, and Bright Energy Solutions wants to help you save energy and save money. Listed below are 10 tips to help you control your energy usage and keep you comfortable in your home:

1. Set your thermostat to 68 degrees.
2. Install a programmable thermostat.
3. Use compact florescent light bulbs with the ENERGY STAR label.
4. Turn off the lights.
5. Unplug your computer and other small electronic devices and appliances when not in use.
6. Lower the thermostat on your water heater to 120 degrees.
7. When shopping for new appliances or home electronics, look for the ENERGY STAR label.
8. Run your dishwasher and clothes washer only when fully loaded.
9. Clean the lint from your dryer, *every* time.
10. Conduct your own energy audit. Visit www.energysavers.gov for more information.
